

Ecoefficient Compost Tumblers

Are you getting tired of shoveling your compost?
Does it take months to have nutrient rich soil for your garden?
Are you filling the landfills with food and yard debris?

None of these questions need to be asked when you have an "Ecoefficient Compost Tumbler." It takes the shoveling out of composting and with a couple of spins a week you won't be waiting around to feed your plants the soil that they have always dreamed of.

Holds up to 7 cubic feet of material

Compost ready in 3-5 weeks!!!!

Stationary Model

Mobile Model

Made in the USA

- Every part that goes into making these composters is either recycled or made in the USA.
- The frame is made from aluminized metal that will not rust and can hold an excess of 300 lbs.
- The barrel is food grade and VERY strong. There will be no leaching of any harmful chemicals.
- The tumbling action makes for easy mixing. Two handles on bottom for leverage with rotation.
- Twist-off lid for easy access and security.
- The Ecoefficient Compost Tumbler (wheeled model) has lift to roll capabilities.
- 2 side air vents and 1 bottom air vent create essential ventilation.
- The strength, value, and quality of the Ecoefficient Compost Tumbler is unparalleled in the marketplace today.
